DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Alheim (US 5,253,285).

Regarding claims 5-22, Alheim discloses an end-user device (TDD device) comprising:

a receiver that receives a first type or a second type of characters (characters in a letters mode or a numbers mode; col. 8, lines 15-19);

a presenting device (TDD display); and

a converter that responds to a signal (predesignated key is pressed by the user to switch between letters mode and numbers mode when the displayed message appears as jumbled nonsense; col. 8, lines 23-26).

Allowable Subject Matter

3. Claims 1-4 are allowed. The prior art of record fails to teach or suggest a signal-to-text conversion gateway in which the converter is responsive to a signal received from the destination.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hepworth et al., Hansen et al., Haimi-Cohen show other TDD systems which handle letters and figures modes.
